

CAMPAIGN_ADVERTISE

For given below database create the list of the customers who have the most failure and most success in Ad campaigns.

There needs to be exactly two rows that contains type, customer, campaign, total.

- Type contains 'success' in the first row and 'failure' in second . these related to event.status.
- Customer is the customers.first_name and customers.last_name separated by single space.
- Campaigns is the comma separated list of campaigns.
- Total is the number of associated events.

Report only two customers , the 2 with the most successful and the most failing campaigns.

SCHEMA:

SAMPLE TABLES;

Events	
campaign_id	status
1	success
1	success
2	success
2	success
2	success
2	success
2	success
2	success
3	success
3	success
3	success
4	success
4	success
4	failure
4	failure
5	failure
5	failure
5	failure
5	failure
5	failure
5	failure

campaign		
id	customer_id	name
2	1	overcoming challenges
4	1	business rules
3	2	YUI
1	3	quantitative finance
5	3	MMC

Customers		
id	first_name	last_name
1	sanjay	sharma
2	parth	patel
3	shrestha	vyas

EXCPECTED OUTPUT;

event_type	customer	campaign	total
success	sanjay sharma	business rules, overcoming challenges	7
failure	shrestha vyas	MMC	6
